Available Administrator Settings Table (Remote UI)

06RH-205

If the administrator is specified, you can restrict operations by general users and allow the administrator to set the settings of each function from ⊛(Settings/Registration). The settings available for operation vary according to the type of administrator. This section describes the settings in ⊛(Settings/Registration) that each administrator can operate.

Preferences
Function Settings
Destination Settings
Management Settings

> **IMPORTANT**
>
> For information on the types of administrators, see "Administrator Settings."
> All users can set the settings in [Adjustment/Maintenance] (Settings/Registration).

Preferences

If the administrator is specified, the settings below in Preferences can be set only by the administrator.

✓: Only the administrator can change the settings.
